General Usage

I used to indicate .1 for a 1/3 inning in the older software. I am getting some weird numbers if I use .3 or .7. How can I go back to using .1 and .2 for 1/3, and 2/3 innings?

As long as you have Statbook version 3.2 (or higher), this is now possible. Be sure to check out the Videos Page for a short tutorial on how to do this. The basic steps are as follows:

1. Go to the Games Input and change all your partial innings to .1 or .2
2. For every report and every statistic which uses Innings Pitched (i.e. IP, ERA, WHIP) you will need to select that field and use the corresponding "Favorites" formula
