

General Usage

I am trying to find a stat tool for my men's softball team and I want it accessible via the web. What are the basic steps in using Statbook? Do I need to set up a database?

The process would go something like this:

1. Input the data into Statbook
2. Setup the reports and fields the way you like
3. Don't forget to Save the file ;)
4. Build the website (either to your hard drive or you can use the built-in FTP option)
5. If saving to your hard drive, copy the files to your web server (via another FTP program or some other mechanism)

After each game, you would repeat this process. There is no database involved. Just more files are created after each game and some pages (i.e. Reports) are updated.
